Date of Software Test: Bet and Guess

Name of Software Tester: Yaha

Feature 1 **<guessing and random number>**			
TEST CASES (student 1)	**EXPECTED OUTPUT (student 1)**	**GENERATED OUTPUT (student 2)**	**REQUIRED FIXES MADE** **(student 2)**
If you input "hello"	Invalid entry, please try again		
If input 6 and random number is 6	You win		
If you input 5n and random number is 5	Invalid entry, please try again		
If you input 4 and and random number generator generate number 3	You lose		
If you input 7	Invalid entry, please try again		
If you input "a"	Invalid entry, please try again		
If you input 3 and random number is 3	You win		
Feature 2 **<Type description of test feature here>**			
TEST CASES (student 1)	**EXPECTED OUTPUT (student 1)**	**GENERATED OUTPUT (student 2)**	**REQUIRED FIXES MADE** **(student 2)**
If you input "hello"	Invalid entry, please try again		
If input 6 and random number is 6	Points double that you bet		
If you input 4n and random number is 5	Invalid entry, please try again		
If you input 4 and and random number generator generate number 3	You lose the points you bet double		

If you input 0	You lose the points you bet because it is not in the 1-6 number range		
If you input "a"	Invalid entry, please try again		
If you input 3 and random number is 3	You win and the points you bet double
